EICA HAS ANSI ACCREDITATION

IN THIS ISSUE

Ladies and Gentlemen,

It is my pleasure to announce that Electrical Industry Certifications Association (EICA) has achieved accreditation from American National Standards Institute (ANSI) for personnel certification accreditation bodies. The accreditation covers the following schemes; Stationary Control Crane Certification, Rotating Control Crane Certification, and Digger Derrick Certification.

I would personally like to thank every person that has contributed to the program's success. Gaining accreditation from ANSI took numerous years of development and countless hours by volunteers across the United States. Without your guidance and support, EICA would have never met the rigorous standards set forth by ANSI/ISO 17024.

ANSI has already listed EICA as an ANSI accredited body, please see the attached link:

<https://www.ansi.org/Accreditation/credentialing/personnel-certification/AllDirectoryDetails?&prgID=201&OrgId=2215&statusID=4>

Thanks,  
Neil Tolson  
Executive Director  
Electrical Industry Certifications Association
